

Avira For Business
Professional Security Solutions

Extreme Reliability™ For Your Desktops, Laptops, Servers And Networks.

No matter the size of your operation, you need your systems up and running full-time. If malware outbreaks are disrupting your productivity, you need to rethink your security solution.

Invest in Avira, and Internet security quietly drops off your urgent agenda. The same reliable protection can cover all your systems; from desktops and laptops, through a mix of multiple Windows or Unix computers across a network, to your email, Exchange or web servers. You get antivirus engineered to minimize system impact, use minimum memory and processing power to scan traffic, email, files and archives in real-time, and includes automatic updates.

Avira has taken care of the things you find important, like making it easy to control all antivirus protection across your entire network from one central console. Like helping conserve your IT budget by discounting license bundles for multiple machines – including free updates to the latest versions. And by giving you simple ways to reduce processing load, such as freeing up your servers by cleaning email in the cloud.

From small to large companies, public to private, commercial or educational, choose Avira for your security solutions. Then everyone can just get on with their work.

Choose Avira Professional Security:

Extreme Reliability™

One solution for all your Windows and Unix machines

Truly integrated, cross-platform virus and malware protection.

High performance protection

Powerful proprietary antivirus technology that consistently wins top awards for detection and performance.

New dangers neutralised fast

Our virus lab works around the clock to prevent the latest threats.

Always on the hunt

Monitors every file access in real-time, even in archives.

Low bandwidth updates never hold up your workflow

The industry's most compact program updates and virus pattern database files automatically download via the Internet without system interruption.

Rocket-speed simultaneous scanning of multiple files

Using file caching and multi-threaded design.

Easy To Configure And Manage

Stay in control

Comprehensive notification and reporting functions are built in to the Avira Security Management Center, an integrated scheduler lets you automate routine tasks.

Simple, intuitive interface design

Start actions like updates and test runs directly from Security Management Center. Stick with our standard configuration or set your own expert level (Windows only).

Create different configuration profiles for different users

Allow access to the Wizard for custom configuration (Windows only).

Easily adjust security levels

Manage the recursion depth when dealing with archives.

Safely isolate infected and suspicious files

Using Quarantine Management under Windows.

One-click virus removal

Virus found? Virus gone! All with one click of the QuickRemoval tool, controlled from the Avira Security Management Center.

Fix PC problems

GenericRepair fixes PCs fast, solves issues automatically.

Easy integration

Into any WMI (Windows Management Instrumentation) system (Windows only)

Excellent interaction with Unix systems

Send SNMP traps for security-related incidents, trigger automatic product updates via the Avira Security Management Center, now supports package management via RPM.

*“freedom to get on with
business”*

Preserves Your IT Budget

Extremely low administration overhead

“Set and forget” automated workflows, everything managed from one single point.

Intuitive operation saves you time, effort and money

No need for expensive training or user education.

All inclusive

Free updates, free upgrades and free Avira Gold Support included with every license during update period.

Transparent licensing

No hidden costs or essentials that aren't included.

Won't stress your systems

Fast, resource-saving scanning technology reduces the load on servers, networks, PCs and storage drives, so they last longer.

No-cost platform change

Switch to a new or alternative supported operating system and your Avira license moves too, at no extra cost.

Sets Your Computer Users Free

No worries online, whatever your users do

Detects and prevents infection from known viruses, worms and Trojans.

Let users browse care-free

WebGuard prevents visiting malicious websites. AntiDrive-by protection stops sneaky malware downloads while surfing.

Stops interruptions, blocks online snoopers

Protects against timewasting adware, spyware and phishing attacks.

Saves time and effort dealing with emails

MailGuard scans all incoming and outgoing emails and attachments to make sure they're safe. AntiSpam filters out unwanted spam messages for all users.

Keeps your computers, strictly yours

Blocks unknown assailants from taking over individual PCs. AntiBot stops hackers from recruiting individual computers into botnets. AntiRootkit catches malware hiding deep in your system.

Stay unconcerned about the unknown

Catches and blocks even new and unidentified viruses, because Avira ProActiv recognises them by how they act. AHeAD-Technology halts unknown code that looks suspicious.

Slams another door in the face of hackers

Hides each computer behind an extra Desktop FireWall, configured through the Security Management Center.

Always full speed security

Works fast, even on lower performance, low memory laptops, tablets and netbooks.
