

You don't need to be a **cybersecurity expert** to make the right decisions.

As a director, you are responsible for your organisation's digital security: assessing your security level, analysing risks, tightening measures. PAKAROS gives you oversight, complete compliance documentation and proactive, tailored advice.

No surprises. No technical jargon. Just clarity and control.

*⚠ NIS2 BOARD RESPONSIBILITY

Under the NIS2 Directive, directors are personally **responsible** for inadequate security measures. This personal fine can run up to **€ 900.000**. Organizational fines up to 10 million or 2% of global turnover.

THE RISK

✓ SMEs are increasingly targeted

67% of cyberattacks target SMEs without mature security monitoring

✓ Slow detection costs time and money

Globally, organisations need an average of 241 days to identify and contain a data breach. The longer an application landscape stays fragmented, the longer that period takes in practice.

✓ Slow detection costs time

Globally, organisations need an average of 241 days to identify and contain a data breach. The longer an application landscape stays fragmented, the longer that period takes in practice.

✓ AI amplifies the threat

AI is not primarily used to create new types of malware, but mainly to speed up malware development. That increases both the volume and the quality of attacks.

THE APPROACH

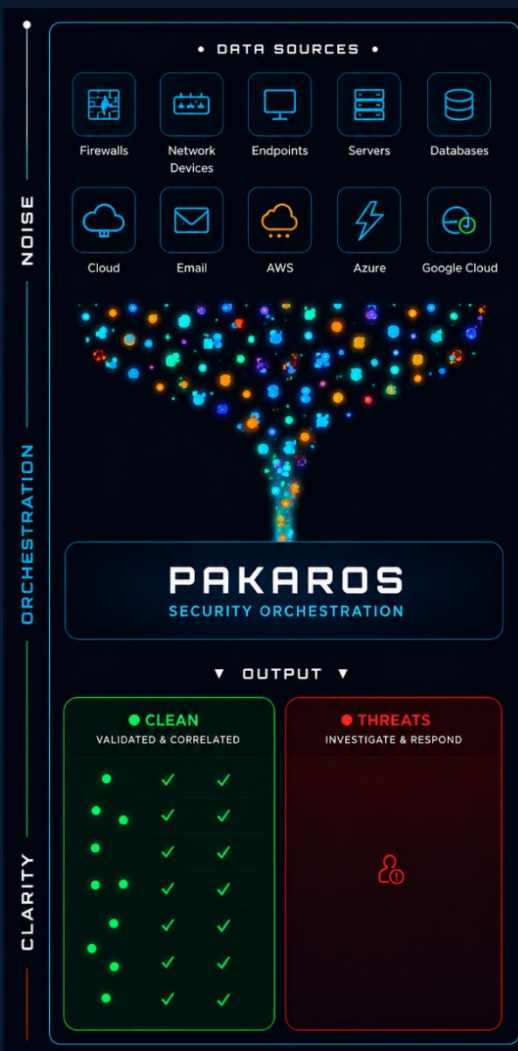

€ No extra investment
Our platform works with your existing network; no solutions need to be replaced before it works

>> An extension of your security team
We monitor 24x7 and step in whenever an incident occurs.
We also provide targeted, periodic security advice.

€ Transparent and cost-effective
Fixed price per agent. No hidden costs or surcharges

N L AI and Security
PAKAROS believes in the power of AI, but always keeps a 'human in the loop' to stay in control.

THE PLATFORM

24/7

Threat Monitoring

100% European Hosting

Built, hosted and governed in Europe.

< 4 weeks

To go live;
Fast onboarding.

BUSINESS CONTINUITY

Keep your organisation operational also during incidents.

COMPLIANCE

Demonstrable compliance with NIS2, DORA and ISO 27001. Connects every security solution

CONTROL

The board always knows what is going on. No surprises. No crises without context.

FROM NOISE TO CLARITY AND CONTROL
